

ARCTIC MOSS SPHERES

USER AND INSTALLATION GUIDE

Welcome to interior design enhancement with Arctic Moss

Arctic Moss Spheres are an exciting design product for interior use.

They are handmade from **natural** reindeer moss, which began its journey to you with careful hand-picking in the forest.

Then the moss was manually coloured and preserved, and finally it was integrated with an appropriate backing.

Like reindeer moss in nature, the coloured and preserved moss of the Sphere reacts inherently to ambient humidity. These natural characteristic changes do not harm the product.

1 PRODUCT PACKAGE CONTENT FOR INSTALLATION

- Moss Spheres
- Metal eye
- Hanging wire, wire clamps, screw hooks and wall plugs

2 TYPICAL TOOLS NEEDED FOR INSTALLATION

- Tape Measure
- Cordless Drill or Screwdriver
- Scissors for cutting the hanging wire

PRECAUTIONS!

The product is meant for interior use only; it is not meant for consumption and should not be tasted or eaten. The product is not suitable for children or pets.

Plastic bags are used in the product's packaging; to avoid any danger of suffocation, keep these away from children and pets.

Always check for services (e.g. plumbing, gas or electrical wiring) behind the wall surface before drilling or fixing to it.

ARCTIC MOSS SPHERES

▲ PRIOR TO INSTALLATION

- 1 • Wear gloves when handling Arctic Moss.
• Make sure the ceiling is suitable to fasten the Spheres to and solid enough to carry the weight of the product.
- 2 • This product is best installed by two people.
• If you require use of ladders or lifting equipment, please ensure that the relevant Health and Safety procedures are in place prior to installation.
- 3 • Determine desired hanging height and length of the suspension wire.
• Arctic Moss Spheres can be suspended from each other as shown.
• Please ensure adequate support for the combined weight is provided.
- 4 • Make sure the screw eye and wall plug (if required) are suited to the type of ceiling.

TO KEEP YOUR ARCTIC MOSS SPHERES AT THEIR BEST, please note that :

- The product cannot be placed in direct contact with water.
- The moss of the product may be touched only with utmost care when the moss is dry. The moss dries and breaks easily when the relative humidity of the air is under 40%. Above that, the moss gradually starts to soften.
- Avoid placing the product in direct sunlight as this can cause some discoloration of the moss over time.
- Arctic Moss is virtually maintenance free, although if desired, it can be cleaned carefully with the dust brush of a vacuum cleaner at very low power. Try on a small section first to check that it won't damage the moss.
- Store the product in a plastic bag until fitted.
- Dispose of the product in general waste.

ARCTIC MOSS SPHERES

▲ INSTALLATION OF ARCTIC MOSS SPHERES

1 Mark the position of the fixing

- Decide on the location and drop height of the Arctic Moss Spheres and mark the position of the fixing.

2 Attach screw eye to the ceiling

- For fixing to timber, screw the eye in, pre-drilling if needed, whilst ensuring sufficient grip is maintained.
- For concrete ceilings, drill a hole to take the plastic wall plug first, insert plug and then screw the eye into it

3 Hang the Arctic Moss Spheres

- Check the screw eye is firmly attached to the ceiling
- Connect the supplied hanging wire to the Sphere, adjusting wire length to suit the desired drop height
- Connect the hanging wire to the screw eye and lower the Sphere gently until supported, ensuring the fixing can take the weight

TIPS FOR USE:

- If you want to adjust or move the Arctic Moss Spheres, use karabiner type removable snap hooks.
- Arctic Moss Spheres are available in different sizes and colours. Dramatic effect can be easily created by varying size and order of the colours.
- The Arctic Moss Spheres also work well when used with other Arctic Moss Tiles and Islands.
