SPECIAL EFFECTS

LONDON BRICK SPECIAL COLOURS

LONDON BRICK - WITH APPLIED SIGN WRITING BY OTHERS

CREATE THE MOOD

GREAT CREATIVE SCOPE AND VISUAL IMPACT

Enhanced atmosphere leads to increased footfall, longer dwell time and higher revenue. Visual impact is essential when enhancing the atmosphere, so selecting the right wall finish can make the vital difference to achieving your Return on Investment, and that is where we help you.

All our **London Brick** panels recreate the superb characteristic textures and features of the original walls, and contain in excess of 50% natural pigments, oxides and minerals. With 8 designs and colour options in the range, it gives you great choice for creating outstanding ambiances.

CONSISTENT FINISH

ENABLES BRAND CONSISTENCY ACROSS MULTIPLE LOCATIONS

Do you ever wish for a consistent finish across multiple locations to maintain a strong brand standard? We are very experienced at working on roll out programmes and deliver our panels all over the country, from Dover to Dublin and Truro to Thurso. By using our **London Brick** panels it ensures that every project is finished quickly with the same great look and feel, giving continuity to your roll-out programme both in the UK and overseas.

ROBUST AND DURABLE

MINIMISE RE-DECORATION WORRIES

The last thing any client wants is to have the hassle and expense of replacements, repair and redecoration a few months after completing a project. Our **London Brick** panels are highly durable and have been used since 2006 in busy areas with high footfall such as bars, cafés, stairways, airports and even nightclub toilets!

LARGE PANEL SIZE

NO POINTING OF INDIVIDUAL BRICKS

The ease and speed of installation can make a big difference to the success of a project. The large size of our **London Brick** panels (approx 4.2m²) means the wall coverage is rapidly achieved with minimal jointing. Plus you are spared pointing every single brick, which eliminates the hassle of cement mixers or wet trades and mortar drying times.

Some projects have extensive areas to cover, including multiple storeys. Our **London Brick panels** are simply lifted up and screwed back, covering large and sometimes awkward areas quickly and easily, saving time and money.

QUICK TO INSTALL

LESS SITE DOWNTIME AND COST

The sooner the store is open, the less disruption and cost there is, and the quicker the venue begins to earn revenue. Our **London Brick** panels are the rapidly installed alternative to the real thing – perfect for projects with tight timescales as they reduce the install time drastically. In many compressed projects the fit out is done overnight or at the weekend. **London Brick** panels enable you to transform interiors with amazing speed.

LIGHTWEIGHT

NO NEED FOR STRUCTURAL SUPPORT WORK

When you are tight for time and need to keep costs down, the last thing you need is to begin strengthening the structure to cope with a traditional brick wall. **London Brick** panels weigh just approx. 7kg per m², which means they are easily fixed to most substrates without needing to strengthen them – ideal when you are working on a project a couple of storeys up!

ADAPTABLE PANELS

EASILY CUT TO SHAPE ON SITE

Do you want to create the great visual impact of bold shapes? Our **London Brick** panels are easily and quickly cut and adapted on site to suit all manner of designs.

Do you want to create impact with curved walls or vaulted ceilings? **London Brick** panels can be installed on convex and concave curved surfaces, and their minimal weight means they can easily be used on the ceiling. **London Brick Multi** was selected for the fantastic curved ceiling of this restaurant in central London as its flexibility, low weight and speed of install lent itself perfectly to the application.

STANDARD AND FR GRADE

GREAT FOR USE IN SENSITIVE LOCATIONS

Some sensitive locations require Fire Retardant finishes. We can produce our **London Brick** panels in Fire Retardant Grade for these applications, which have been used in many high profile areas such as Victoria Station, Canary Wharf, Harrods, Selfridges, Imperial War Museum, Gatwick, Luton and Stansted Airports.

TRANSFORMING SPACES

“ The client is so delighted that they might not put artwork on the wall – they don’t want to cover the brick as it looks so good”

We delivered 6 panels to site last thing on a Saturday afternoon for this client, and they went up so quickly that the Casual Dining project was fully finished by Sunday afternoon

“ Client really happy - job looks great...”

The project needed 150m2 of brick to be installed on the 3rd floor of an extensive London office. Our panels were installed quickly with no need for strengthening work to the partitions or floor, helping this busy project complete successfully.

In a similar project, our London brick panels were used on all 5 floors of a London Mews development for the same reason.

COMMERCIAL OFFICE

The London offices of this leading global market intelligence provider called for a stunning solution for the reception and break-out areas. The fast-moving project required an adaptable system due to its imaginative use in varied applications. **London Brick Aged Red** was ideal as it was used for walls, columns and was also integrated with bespoke shelving.

The system also needed to be both durable and lightweight. We met these requirements with ease and the finished result is a stylish and welcoming workspace, both highly impressive to visitors and ideal for the wellbeing and productivity of staff. With concealed joints and large panel sizes, we achieved a seamless finish with an effortless and natural feel.

GREAT FOR RETAIL

The owners of Kent & Curwen, the quintessentially British brand aimed to create a “space that feels traditional yet modern, luxurious yet grounded” to match “the product which follows the same ethos.”

The designers chose our **London Brick White Textured Panels** for this flagship store in the centre of London.

Combined with fixtures in metal and distressed timber, white textured walls created an ideal backdrop for showcasing the collection without being too overpowering, helping to achieve the desired traditional look with a modern twist.

All the panels were prepared by our expert team and delivered on time for a hassle free installation on site.

WORKS WITH SIGNAGE

The interior design for this Pizza restaurant called for a brick look that would work perfectly with sign-writing.

Our **London Brick Multi** and **London Brick White** were chosen as they both met these requirements and were perfect for encouraging dwell time and footfall.

Due to the location, the panels were delivered to the station late at night. Vtec Group's Despatch Team organized a designated vehicle to get them to site at the time the installers needed them.

The panels were then fitted overnight and this fun and quirky feature wall was complete by the following morning.

PANEL INSTALLATION

Please refer to our installation guide for full details

1 Measure, mark out and trim panels as required to align features

2 Raise or lower panels to align features, pre-drill and screw in place, packing out to suit

3 Roughly apply jointing compound to cover joints and fixing positions

4 Shape the jointing compound to suit as it begins to go firm

5 Introduce final texture to jointing compound with brush dipped in cleaner

6 Leave for 24 hours, sparingly apply colour solutions, rag off and blend with surrounding area

EXAMPLE DETAILS

Corners - Raise /lower panels to align features. Mark position of corner, cut to form mitre. Fix panels leaving approx. 5mm gap, apply jointing compound and shape to suit

Finishing exposed edges - If panel end is exposed, use jointing compound to fill panel edge and shape to create brick end

PRODUCT INFORMATION

Vtec's London Brick Panels contain in excess of 50% natural pigments, oxides and minerals. They are produced from original walls with exact natural textures and features in a lightweight but durable panel system.

GENERAL

Applications

For internal use only in all types of environments – Ideal for Hospitality, Commercial, Retail and Leisure.

Appearance

Originates from an original Brick wall.

5mm (not including undulation)

Typical Maximum Relief (Undulation)

15mm

Approximate Weight

7kg per m²

HAVE YOU SEEN OUR CONCRETE, STONE AND TIMBER PANELS FROM OUR TEXTURE RANGE?

The logo consists of the letters 'VTEC' in a teal, sans-serif font, centered on a white rectangular tag that is slightly tilted and has a folded top edge, giving it a three-dimensional appearance. The tag is positioned in the upper left quadrant of the image, set against a dark blue background that meets a yellow background at a diagonal line.
