Please note that due to the natural elements and processes used in creating Texture Panels, colours and dimensions can vary between panels and batches, and images of the product are only indicative of the finished products. We reserve the right to alter specifications and details without notice.

CREATE THE MOOD

GREAT CREATIVE SCOPE AND VISUAL IMPACT

Enhanced atmosphere leads to increased footfall, longer dwell time and higher revenue. Visual impact is essential when enhancing the atmosphere, so selecting the right wall finish can make the vital difference to achieving your Return on Investment, and that is where we help you.

All our **Timber** panels recreate the superb characteristic textures and features of the original walls, and contain in excess of 50% natural pigments, oxides and minerals. With 11 designs and colour options in the range, it gives you great choice for creating outstanding ambiances.

CONSISTENT FINISH

ENABLES BRAND CONSISTENCY ACROSS MULTIPLE LOCATIONS

Do you ever wish for a consistent finish across multiple locations to maintain a strong brand standard? We are very experienced at working on roll out programmes and deliver our panels all over the country, from Dover to Dublin and Truro to Thurso. By using our **Timber** panels it ensures that every project is finished quickly with the same great look and feel, giving continuity to your roll-out programme both in the UK and overseas.

ROBUST AND DURABLE

MINIMISE RE-DECORATION WORRIES

The last thing any client wants is to have the hassle and expense of replacements, repair and redecoration a few months after completing a project. Our **Timber** panels are highly durable and have been used since 2006 in busy areas with high footfall such as bars, cafés, stairways, airports and even nightclub toilets!

LARGE PANEL SIZE

REDUCE TIME CONSUMING CUTTING

The ease and speed of installation can make a big difference to the success of a project.

The large size of our **Timber** panels (approx 4.2m²) means the wall coverage is rapidly achieved with minimal joints.

Some projects have extensive areas to cover, including multiple storeys. Our lightweight **Timber** panels are simply lifted up and screwed back, covering large and sometimes awkward areas quickly and easily, saving time and money.

QUICK TO INSTALL

LESS SITE DOWNTIME AND COST

The sooner the store is open, the less disruption and cost there is, and the quicker the venue begins to earn revenue. Our **Timber** panels are the rapidly installed alternative to the real thing – perfect for projects with tight timescales as they reduce the install time drastically.

Timber Texture panels enable you to transform interiors with amazing speed.

LIGHTWEIGHT

NO NEED FOR STRUCTURAL SUPPORT WORK

When you are tight for time and need to keep costs down, the last thing you need is to begin strengthening the structure to cope with heavy materials. **Timber** panels weigh just approx. 8kg per m², which means they are easily fixed to most substrates without needing to strengthen them – ideal when you are working on a project a few storeys up!

ADAPTABLE PANELS

EASILY CUT TO SHAPE ON SITE

Do you want to create the great visual impact of bold shapes? Our **Timber** panels are easily and quickly cut and adapted on site to suit all manner of designs.

Do you want to create impact with odd shaped walls or vaulted ceilings? **Timber** panels can be installed on convex and concave curved surfaces. **Rustic Timber Washed White** was selected for the fantastic curved ceiling of this restaurant in central London as its flexibility, low weight and speed of install lent itself perfectly to the application.

STANDARD AND FR GRADE

GREAT FOR USE IN SENSITIVE LOCATIONS

Some sensitive locations require Fire Retardant finishes. We can produce our **Timber** panels in Fire Retardant Grade for these applications, which have been used in many high profile areas such as Victoria Station, Canary Wharf, Harrods, Selfridges, Imperial War Museum, Gatwick, Luton and Stansted Airports.

HEADQUARTERS FOR A PROJECT TEAM

Our **Weathered Sleeper Oak** panels were selected for this stunning office design for a team managing a multibillion 7 year London project.

With looks just like the real thing, the panels grace this striking foyer alluding to nature: interlaid with moss, they help to capture the concept of creating a greener environment. At a fraction of the weight and hassle of solid timber sleepers, our panels helped installers finish on time and in budget.

Our timber panels are designed for a quick and easy installation, creating a huge impact and only adding minimal load to the structure.

LONDON OFFICE

For this rapidly expanding business, the employees' wellbeing and motivation are high on the list. So when the time has come to renovate their London offices, the emphasis was made on creating an environment that would be fun and exciting.

Besides conventional areas, the newly renovated premises included game rooms, gyms as well as tranquil booths for the employees to wind down and focus.

These little hideways benefited from our **Rustic Timber Washed White** panels. Easily cut to shape on site, our panels were a breeze to install onto these irregular walls and look great in combination with woodland mural and vivid green carpets.

INSPIRING SHOWROOM

When the manufacturer of this innovative furniture for commercial environment secured a new showroom, they wanted to create an atmosphere that would be both stimulating for the employees as well as welcoming and relaxing for visitors.

They divided the space into various functional zones, creating a distinct feel for each of them. They chose to clad the bar in our **Rustic Timber Dusty Black** making it snug and informal.

The boardroom has been transformed by covering the wall with our **Weathered Sleeper Off White**, creating a perfect backdrop for their branded Scandi inspired furniture.

RESIDENTIAL DEVELOPMENT

This lakeside apartment development is a great example of successful application of materials that create a luxurious look with minimal effort.

The designers of this project used our **Stacked Timber Brown** panels in **FR** grade for the lobby, setting the tone as soon as you step in.

Our timber panels perfectly replicate the beauty of natural timber, adding a warm feel to the property. Paired with integrated lighting - enhancing the details, they create an impressive focal point, drawing the visitor in.

PANEL INSTALLATION

Please refer to our installation guide for full details

1 Measure, mark out and trim panels as required to align features

2 Raise or lower panels to align features, predrill and screw in place, packing out to suit

3 Roughly apply jointing compound to cover joints and fixing positions

4 Shape the jointing compound to suit as it begins to go firm

5 Introduce final texture to jointing compound with brush dipped in cleaner

6 Leave for 24 hours, sparingly apply colour solutions, rag off and blend with surrounding area

EXAMPLE DETAILS

Corners - Raise /lower panels to align features. Mark position of corner, cut to form mitre. Fix panels leaving approx. 5mm gap, apply jointing compound and shape to suit

Finishing exposed edges - If panel end is exposed, use jointing compound to fill panel edge and shape as required

PRODUCT INFORMATION

Vtec's Timber Panels contain in excess of 50% natural pigments, oxides and minerals. They are produced from original walls with exact natural textures and features in a lightweight but durable panel system.

GENERAL

- Applications** For internal use only in all types of environments – Ideal for Hospitality, Commercial, Retail and Leisure.
- Appearance** Originates from an original Timber wall.
