CLEANING & MAINTENANCE GUIDE

Texture Panels are virtually maintenance free.

Dry dirt, dust and loose particles can be removed occasionally. Use a duster with brush, or vacuum using a soft brush attachment.

General dirt or marks can be washed off using plain water.

Panels can be hosed down if the location is suitable, otherwise a soft brush or cloth may be used with water, rinsing clean as you proceed.

DO NOT use solvents or any cleaner with an abrasive content.

DO NOT use pressure water.
